

October 21, 2019

I Florence Jaffre, Managing Director of By Ytsara (Thailand), Co., Ltd. would like to express my full satisfaction on the air conditioning net CONTINEWM we have purchased from TEE (Thailand) Co., Ltd. in July.

After the installation of the nets on our main air conditioners, we saw our consumption reduced by more than 47% (from 2626 Kw/in June to 1781 Kw/October) far above the conservative 25% Mr. Gal had promised.

But not only did we save energy, thus in a humble way contributing to a lower Co2 emission, we also saw a dramatic improvement the air quality. It is now more fresh and crisp. We all feel that the air is cleaner and lighter.

We have also learnt a lot about energy saving thanks to Mr. Gal's training. He has inspired my team to be savvier on energy not only in our company but in their everyday life.

I would therefore very highly recommend this product to you. For further question, you can get in touch with me at [fjaffre@ytsara.com](mailto:fjaffre@ytsara.com)

Kind regards,

Florence Jaffre  
Managing Director
