

Life Is On

**CONTINEWM® Nets
SCHNEIDER Electric
Performance Monitoring Testimonial**

Update : 28th April 2018

Object : Endorsement of energy saving results in Server Room at Schneider Electric Head Office

Client	Schneider Electric (Thailand)	Type - Measurement location	Server room Schneider Electric Head Office
Condition	Real Life utilisation	A/C technology	CRAC system for data centers
		Energy Saving results	Average = 8.3%

- Test result:
 - Measurement of the performance by comparison of the electricity consumption measured by electrical meters specifically installed on the Schneider Electric server room CRAC systems.
 - Period: March - April 2018
 - Comparison done under similar conditions of utilization and same meteorological conditions.
 - Performance measured on average during the period of performance monitoring.
 - Electrical consumption data measured by Schneider Electric engineer.
 - Meteorological data certified by the Thai Meteorological Department
 - Performance: **8.3% electricity consumption saving on average** with CONTINEWM® Net.
