

Eliminate malodor within 3-5 days

Unblock the drains

Clear the septic tank

Clear Bio Plus

Is a highly concentrated bioactive microorganism mass used to degrade **organic** waste as a biological activator for septic tanks and waste water treatment in **condos, households, hotels, hospitals, schools, factories, office buildings, restaurants, etc.**

- **Enhance natural biochemical reaction speed
Combined with the broad spectrum enzyme formulation.**
- **Simply drop 4 taps in the toilet and flush.
Will digest 1000 Liters (1m³) of sewage in the septic tank. The result is visible in 25- 30 days.**
- **Lower BOD & SS**
- **Eliminate malodor within 3-5 days.**
- **Helps maintain a Clear and clean sanitized environment as well as a healthy bacteria population in your septic tank.**
- **Less cost than pumping out.**
- **Non-toxic to humans and animals.**
- **Does not contain corrosive or poisonous substance that will harm either plumbing or septic Tank.**

Fat, Oil, Grease Degradar

Clear Bio Grease is a fat, oil and grease degrader for hotels restaurants and industrial applications and Condos.

Clear Bio Grease contains several enzymes to digest fat, oil and grease (FOG) and other organic waste, typically associated with grease traps and waste water systems. The organic debris will be broken down by the bacteria at the source and not just being transferred downstream to the sewer system. The malodor will be reduced.

Professional kitchens in Restaurants ,universities fast food chains etc, where food is prepared every day , there is always fat and oil and solid food waste, which then find their way into the drainage system .As a result, the problems then begin to develop.

Clear Bio Grease is safe for environment unlike the Toxic chemicals.

Easy to treat to compare with the mechanic method.

How to apply:

1-2 teaspoons per drain followed by a glass of water (normal temperature) or mix with water and pour the mixture directly into the drainage.

Directly mix with the wastewater chamber in the grease trap before releasing into pipeline which leads to the public canal.

Attention:

1. Completely clogged pipes and full grease traps have to be mechanically emptied before starting with the first application.
2. **Clear Bio Grease** does not work in conjunction with chlorine or with high temperature water. (above $>55^{\circ}\text{C}$)

Contains:

Clear Bio Grease is a balanced mix of enzymes, pH regulators and filler materials.
